

Raspberry Pi Tablet

Objective: The creation of the Raspberry Pi Tablet came from an inspiration of others creating this tablet. I also enjoy the idea of having a portable retro gaming system on the go.

Installed Software: RetroPi

Compatible emulators: NES, SNES, Atari, Game Boy, Neo Geo, PSP, PlayStation 1, Genesis, Game Boy Advance, MAME, Nintendo DS, SEGA

Misc.: CPU is above average temperature (48 Celsius). The CPU and RAM each have a heatsink, but will consider adding a fan if desperately needed. Game can also be sent directly via Wi-Fi connection, if device is a raspberry pi 3.
